## 3. Discussion & Key Points

### Topic 1: [Progress Made]

- **Summary:** [Cole stole the show today]
- **Key Points:** [1] RabbitMQ updated to parse the correct I/O from backend to frontend  
[2] Middleware and Consumers now hosted on free credits Oracle Server  
[3] Backend now offering USA and Canada functionality  
[4] Frontend now receiving correct information from middleware, fully capable of being extended to route multiple drivers (The big hurdle is gone)

### Topic 2: [Next Steps]

- **Summary:** Team has renewed vigour after Cole put team on his back and fixed a middleware/frontend issue that was not his original responsibility
  - **Decisions Made:** Jordan/Andrew to integrate the multi-tsp geoline hard coded logic into main asap, which would then mean the dashboard is drawing geolines between markers based on the multiple driver routes queried  
  
Jordan to make the fields indicating num drivers, route options actually pass their data to backend for route query
  - Tristan to rebuild saving/reloading/exporting routes for multiple drivers once Jordan/Andrew complete geolines/poly direction
-
