3. Discussion & Key Points

Topic 1: [Sprint Review]

- **Summary:** [First Sprint officially completed. Each member had the opportunity to showcase the work they'd done]

- **Showcased:** [Cam: Working Landing Page, dashboard with marker drawing, different pages on dashboard such as Billing, Settings, etc. Many of the pages and features on landing page and dashboard were dummy buttons/links but core functionality emerging. Showed how it was hosted on Vercel]

  [Travis and Cole: Showcased their codebase for the beginnings of their GA. Crossover, Selection, Population Class]

[Travis submitted and created Release Planning Doc]

[Jordan : showed how markers are saved and his plan for how these would be sent to the backend. Also showed his plan for displaying distances and times of routes to frontend]

[Tristan: Walked the group through his local branch, where the authorization and account creation code live. Showed his mongodb database. Showed the successful creation of an account.]

[Andrew: Explained his plan for API endpoints between frontend and backend. One function needed to initiate a POST from frontend to backend. A handler on the backend that receives route parameters. A GET from frontend to indicate response handling. Created Product Backlog, specified user stories to be completed Sprints 1 and 2]

Topic 2: [Sprint Planning]
- **Summary:** Team-members assigned tasks for Sprint 2
- **Decisions Made:**   **C**am – To add Integration with GA, deploy and scale with kubernetes

Jordan – To learn and understand how route 'lines' are drawn on map, connecting markers and displaying a route to user on map

Tristan – To add Google Login using NextAuth, to salt password and perform user validation checks upon login

Travis, Cole – To continue working on Single-TSP

Andrew – deploy and scale with kubernetes, assist where needed
