2. Agenda Overview

(List key discussion topics in order of the agenda)

1. [Progress Made in Previous 3 Days]

2. [Moving Forward]

3. Discussion & Key Points

Topic 1: [Progress Made]

- **Summary:** [Each team member went over their work for the week]

- **Key Advances:** [Travis implemented a class that reads GeoJSON route data, parses into X/Y and is seamlessly fed as inputs to GA. After GA returns ordered list of locations, converts X/Y locations back into GeoJSON]

  [Tristan implemented sign in with Google, uses NextAuth]

  [Jordan has on local branch line drawing (not between actual locations, but lines drawn in the general style we've envisioned). They render (work)]

[Andrew has tested Tristan's auth pages, found text overlap bug, regex password pop-up missing, lack of linkage between auth pages and dashboard]

Topic 2: [Moving Forward]

- **Summary:** All team members explained their logical next steps for development.

- **Decisions Made:** [Tristan to continue refining authorization process. Fix bugs Andrew indicated. End result is to have user story for Sprint 2, "Implement API Endpoints for User Authentication" fully completed. Still has to link auth pages to dashboard, implement sign out, implement account settings page.]

[Jordan to continue improving the nodes on map user story. Specifically, add the numbering of nodes based on which order they will fall in a route/which order they are entered onto the marker itself.]

[Cam and Andrew to deploy and Scale with Kubernetes]

[Cam and Andrew to implement the API points between frontend and backend]

[Single TSP to be completed/improved by Turner and Cole by Sprint 2 Deadline]
